

# How Facilities-iQ integrates with FM Systems

---

Achieve compliance and save time

**SFG20**

DRIVING FACILITIES EXCELLENCE

Paul Bullard

Guy Dowsett

# Challenges

---

- PDF, xlsx, docx, xml – a point in time
- Bespoking away from the standard
- Facilities Management Software Solutions are different
- Breaking down the barriers

# Vision

---

- Migrate custom schedules into FM software solutions
- Enabling partner integration
- 2-way data communication

# Key Deliverables

- Only output concise operational data
- Individual steps
- Not just schedules
- Multiple entry points and structures of data
  - asset->frequency->schedule->task,
  - frequency->task,
  - location->asset->frequency->task
- Provide only the changes since a prior date

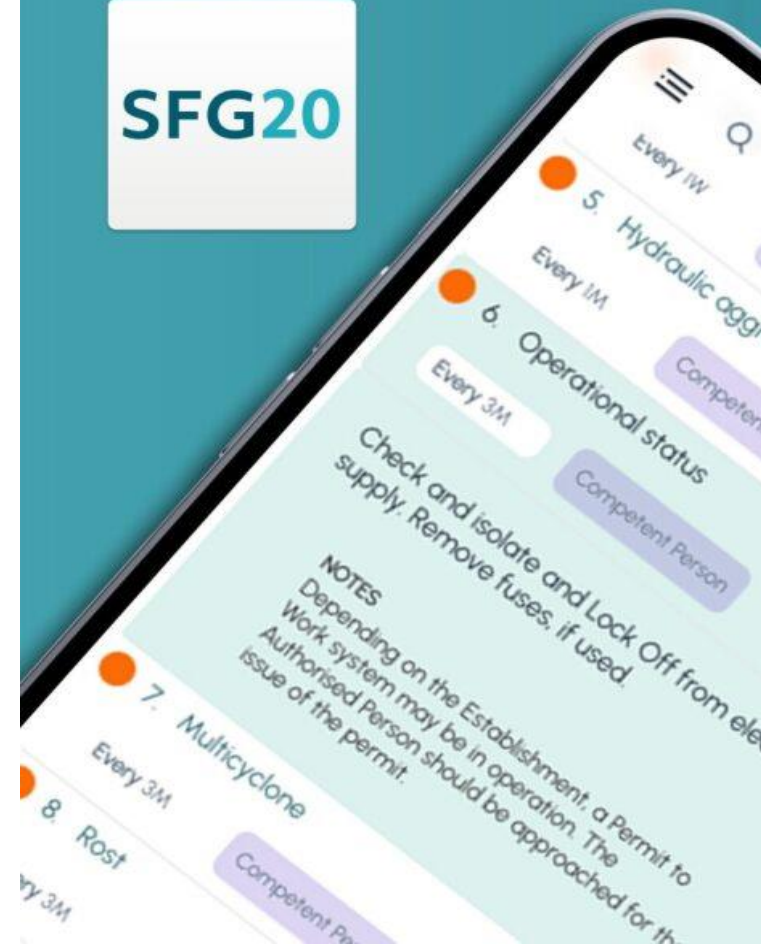

## Complementary Functions

---

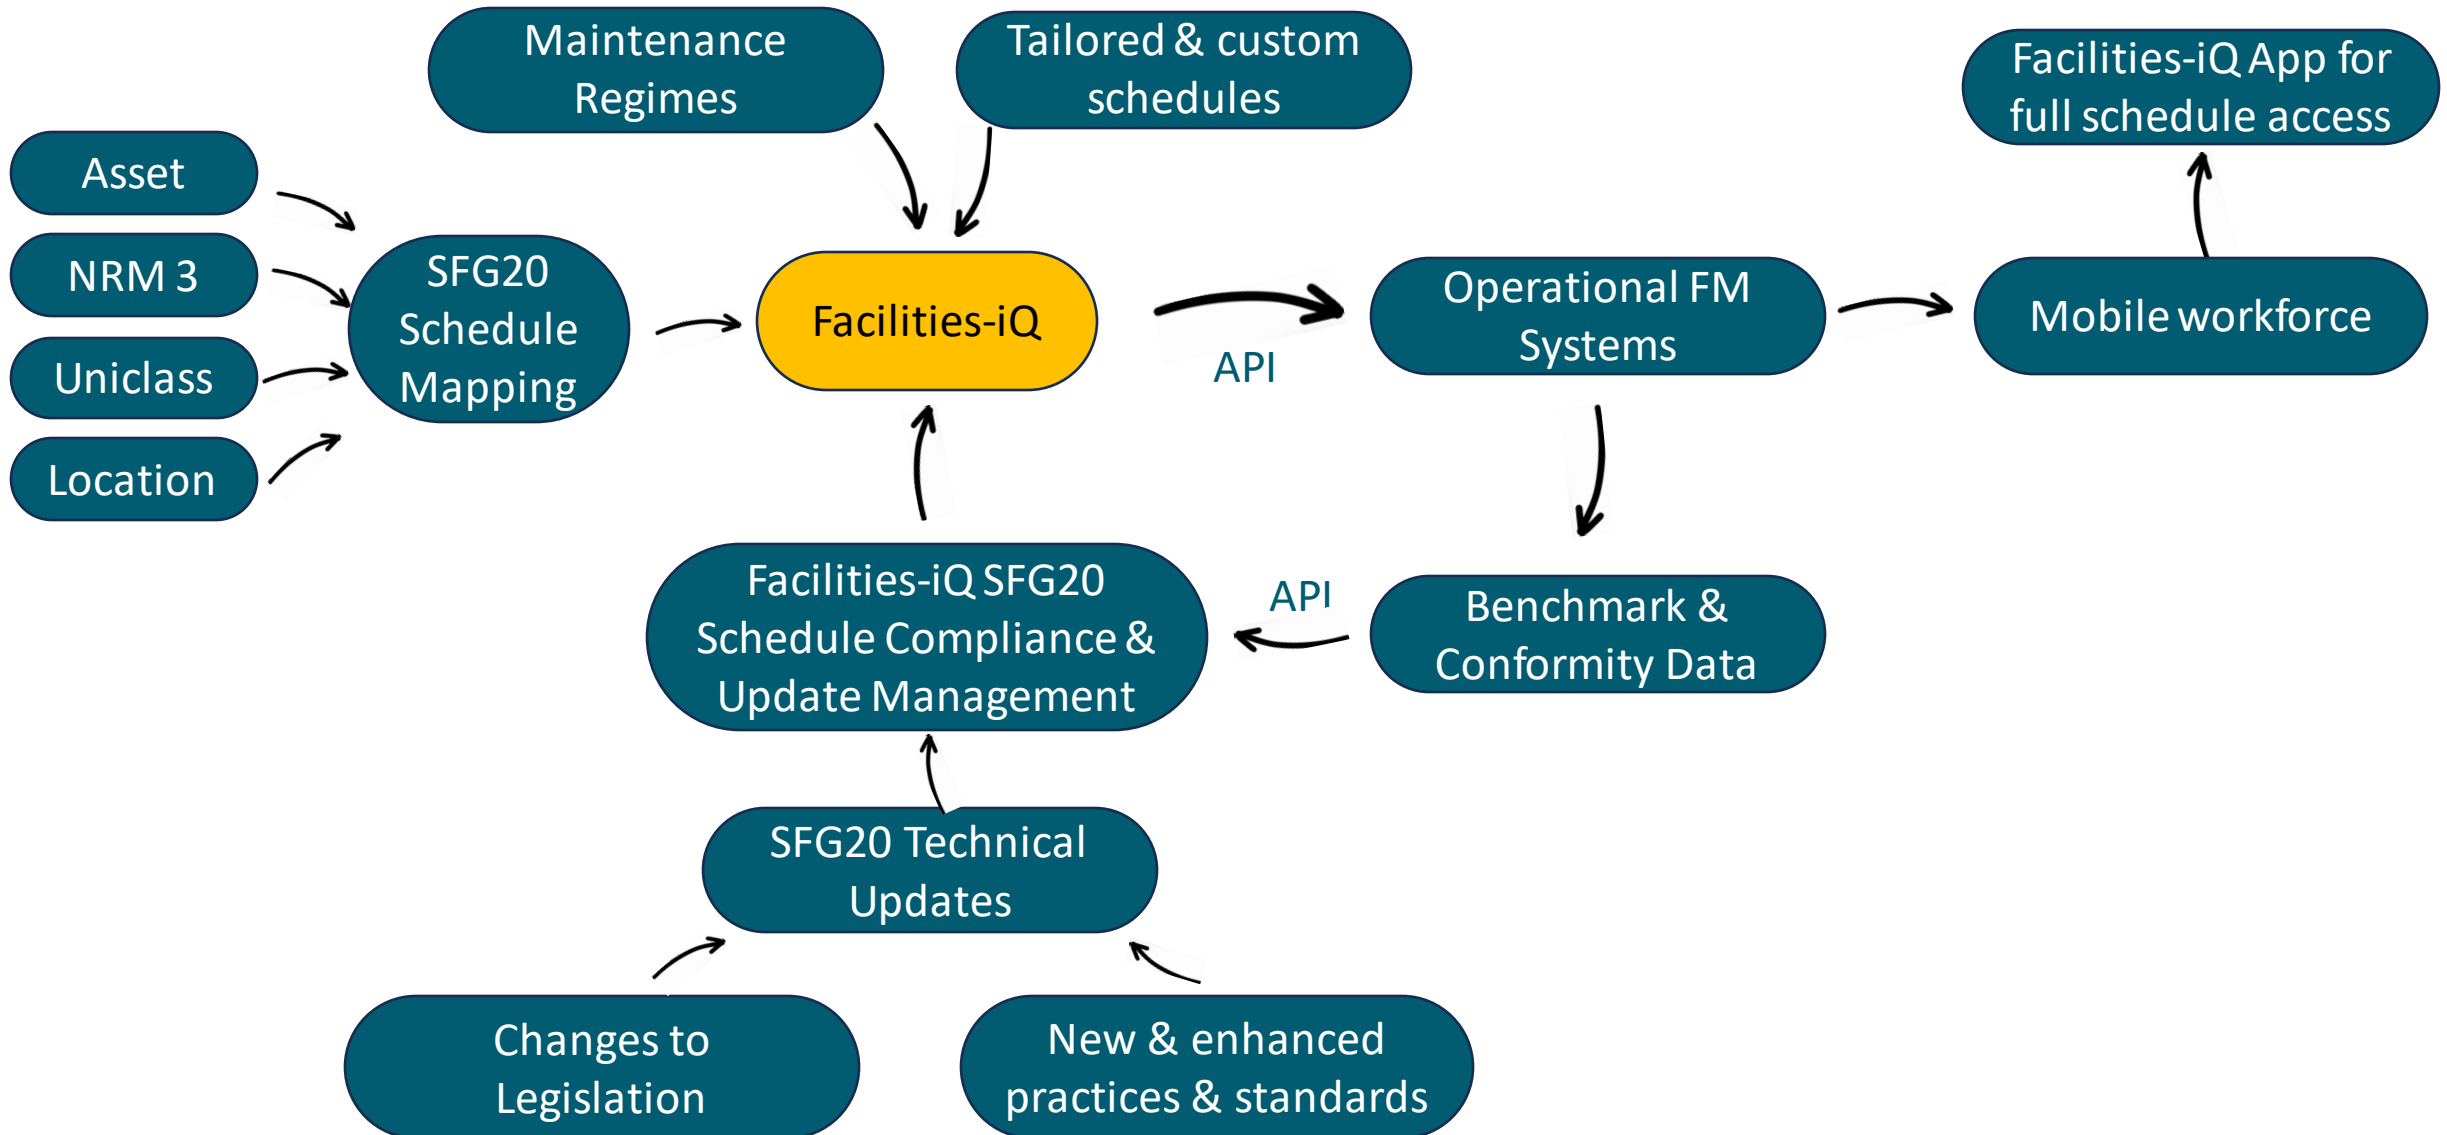

- Partner method to feedback key task completion and benchmark data
- Link to Facilities-iQ App for full schedule information

Achieve compliance with the latest SFG20 standard.

SFG20

# Ecosystem

Never fall off the SFG20 standard again!

The logo features a dark teal circle on the left containing the year '2024' in white. To its right is a vertical dark teal bar, followed by the text 'SFG20 Digital Partner' in a teal, sans-serif font.

# 2024 SFG20 Digital Partner

- Launched March 2024
- Integrate with 3rd Party FM Systems
- Solves Manual Import Issues
- Never fall off SFG20 standard again
- Cost
